IA-PPE coverall is specialized clothing or equipment worn to avoid contact with germs, fluids, hazardous substances to minimize the risk of infection. It is the personal protective equipment made with lightweight, soft and flexible material for optimum user comfort and wearability to protect all elements of the body. It creates a barrier between the potential infectious material and the individual.

This is the protective suit designed to safeguard the health of workers by minimizing the exposure to a biological agent. It offers protection from dust, Bacteria, Virus and many other dry particles that workers come in contact with everyday activity.

Our Non Woven Disposable Coverall are ideal for use in Medical Services, dry chemical applications, food processing and many more.
